DETAILED ACTION

Election/Restrictions

Applicant's election of claims 103-130 in Paper No. 10 is acknowledged.
 Applicant also cancelled the non-elected claims 23-55 and 59-102.

Priority

2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 08/511,230, filed on 04 August 1995.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 19 February 2002 and
 December 2002 were filed and are being considered by the examiner.

Specification

4. The substitute specification filed 19 February 2002 has been entered.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- 2. Claims 103-107, 114-118, 120 and 121 are rejected under 35 U.S.C. 102(e) as being anticipated by Allen (US 5,635,969).

Application/Control Number: 10/076,424

Art-Unit: 2853

Allen discloses an ink jet recording apparatus and method comprising: an ink ejection head (Figure 1, elements 12, 14, 16, 18) for ejecting ink; a processing liquid ejection head (Figure 1, element 20) for ejecting a processing liquid; scanning means for performing a scanning operation (Column 5, lines 24-33); and control means for ejecting the processing liquid depending on a kind of the recording material in use (Column 5, lines 3-9). The control means prevents the ejection of the processing liquid when the recording medium is coated paper, OHP sheet or reception layer paper (column 1, lines 64-67 and column 2, lines 1-6). However, the control means permits the ejection of the processing liquid (A) when the recording medium is plain paper (column 4, lines 22-28). Allen further discloses the processing liquid comprising a cationic material and a polymeric component and the ink comprising an anionic dye and or pigment (column 2, lines 28-37).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 119 is rejected under 35 U.S.C. 103(a) as being unpatentable over Allen (US 5,635,969 in view of Okuda et al (US 5,476,043).

Allen discloses the claimed invention except for reciting that the processing liquid has a surface tension smaller than a surface tension of the ink.

Application/Control Number: 10/076,424

Art Unit: 2853

Okuda et al teaches that the processing liquid has a surface tension smaller than a surface tension of the ink (column 6, lines 8-13).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to separate the ink from the processing liquid.

Allowable Subject Matter

- 5. Claims 108-113 and 122-130 are allowed.
- 6. The primary reason for the allowance of claims 108 and 122 is the inclusion of the limitation of wherein the control means prevents the ejection of the processing liquid from the processing liquid ejection head when a test printing mode operation is carried out. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.
